Re: Possible Closing of NAT Recycling Location

To the users of NAT Recycling:

For more than 20 years, NAT has supported, with the assistance of The Wood County Solid Waste District and The Bowling Green Recycling Center, the operation of it's recycling center. This has been "a loss leader" for our trash business; in other words, it has been at a monetary loss for NAT. But, the users, made up of the homeowners of southeast Wood County, have appreciated this service and the Waste District supported the program.

Recently, The Solid Waste District, with the approval of the Commissioners and it's Administration, has arbitrarily decided to discontinue it's support of certain transportation and processing costs of material recycled from NAT to Bowling Green. This was done without conferring with NAT or The Bowling Green Recycling Center. Neither NAT or BGRC have the funds to assume these costs on a long-term basis nor have we requested additional support.

This was despite for more than 20 years NAT's processed tonnage has and still is, second only to BGRC in the Wood County area. In the meantime, the Waste District's unencumbered funds (cash available) are at an historic high. Citizens should remember, by Ohio Law, the Office of the Wood County Commissioner's is responsible to provide access to recycling through out Wood County. And we provide a heated, well kept all weather 24/7 location for Southeast Wood County.

We, Mike Fairbanks and I, will be studying how this loss of funding will effect NATs operation of the 24/7 recycling, but without the FULL support of The Wood County Waste District, at this time we see the closing of our recycling program in the near future.

We ask you to express your thoughts to your Wood County Officials ===

Office of The Wood County Commissioners = 419/354-9100

Doris Harringshaw

Craig LaHote

Theodore Bowlus

Or

The Wood County Administration, Andrew Kalmar = 419/354-9100

And

Office of The Wood County Solid Waste District = 419/354-9297 = Mrs. O'Boyle

Thank you for your time and understanding.

Mick Torok
